

Tests for class *Label*

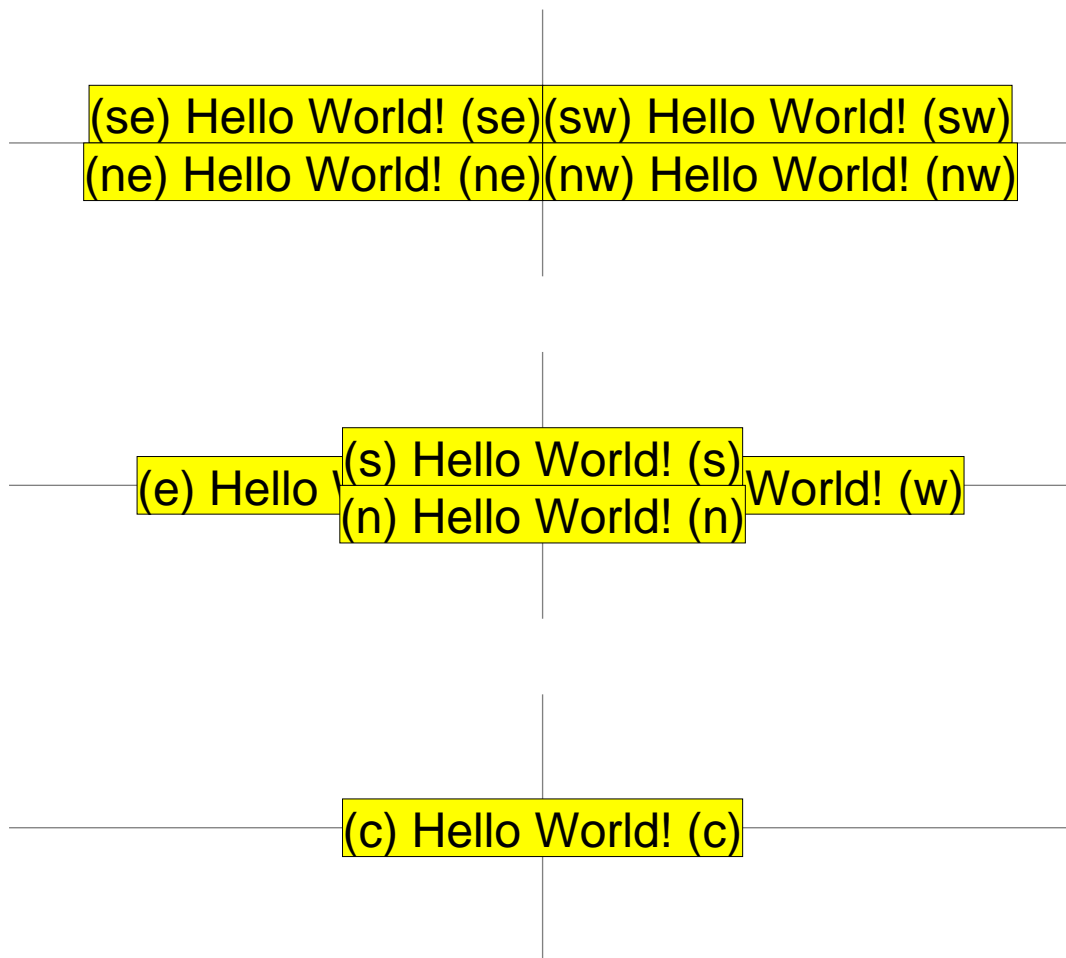

Testing box anchors

This should display "Hello World" labels written as black text on a yellow box relative to the origin of the crosshair axes. The labels indicate their relative position being one of the nine canonical points of a box: sw, se, nw, ne, w, e, n, s or c (standing for *southwest*, *southeast*... and *center*).

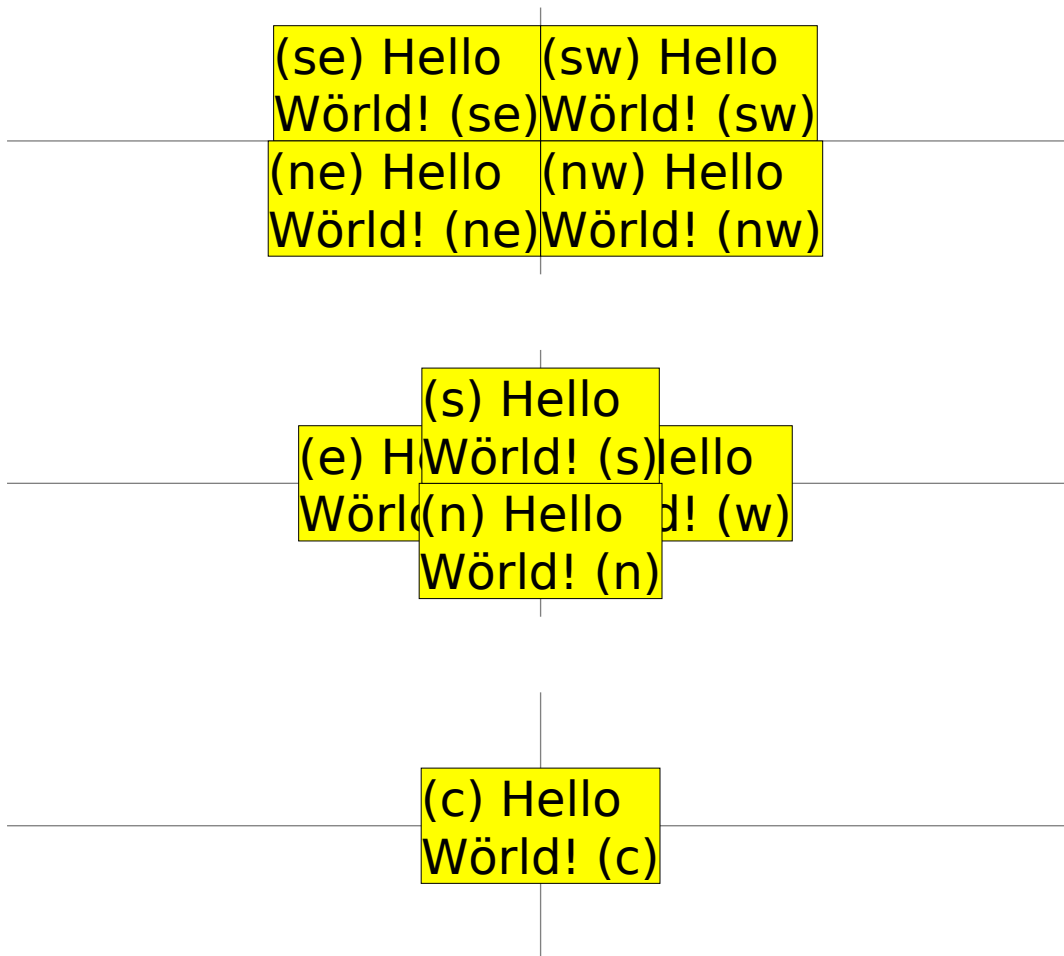

Helvetica 10pt

Helvetica 18pt

Vera 18pt, multi-line

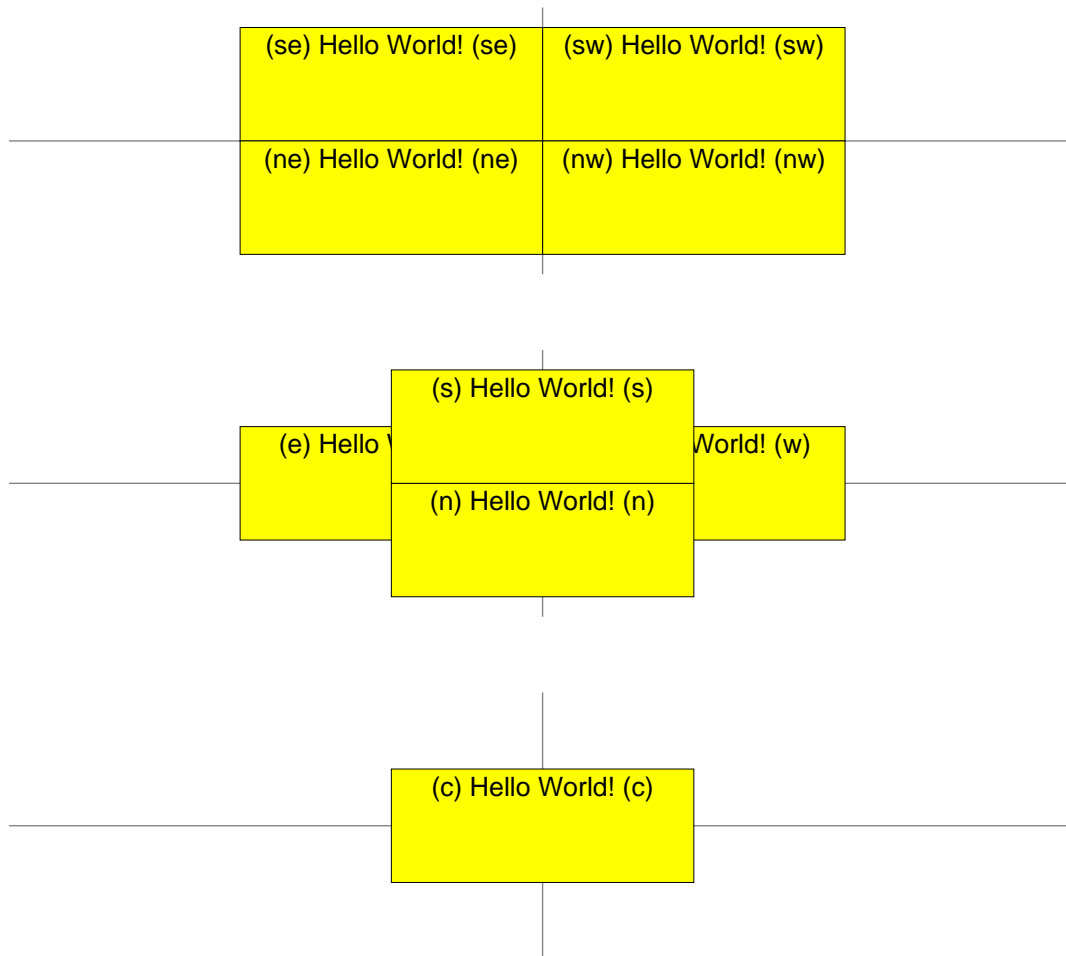

Testing text (and box) anchors

This should display labels as before, but now with a fixed size and showing some effect of setting the `textAnchor` attribute.

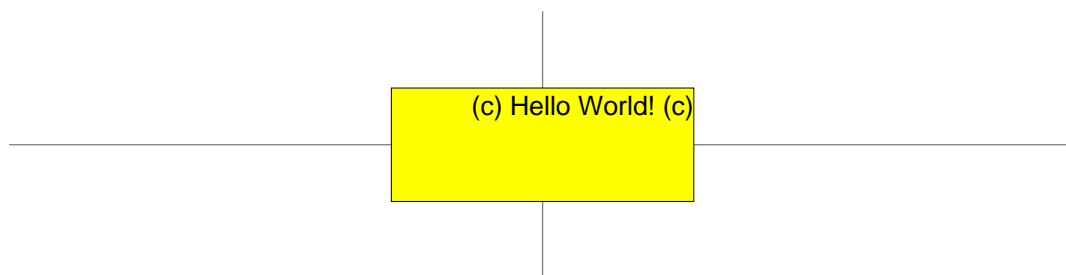

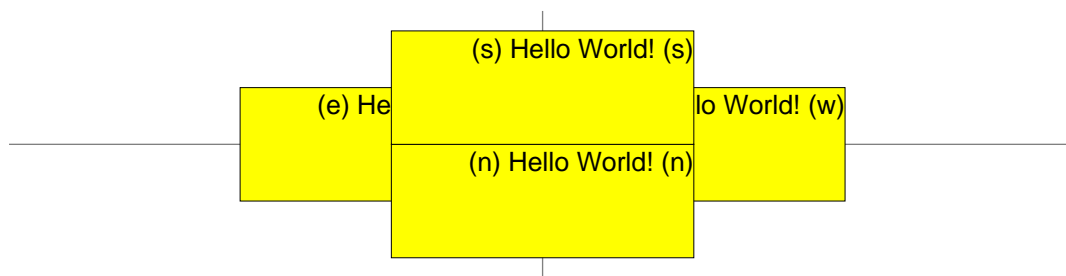

Helvetica 10pt, textAnchor='start'

Helvetica 10pt, textAnchor='middle'

Helvetica 10pt, textAnchor='end'

Helvetica 10pt, multi-line, textAnchor='start'
